Summary

Detail-oriented Computer Science student with practical experience in Java development, SQL databases, and AWS cloud deployment. Proven track record of developing robust CRUD-based web applications, building full-stack modules, and deploying scalable projects on EC2 and S3. Strong grasp of object-oriented programming (OOP), backend development architectures, and the software development lifecycle (SDLC).

Experience

Industry Internship Project – Full Stack Java | *HCLTech (Remote)*

June 2025 – August 2025

- Collaborated within a remote, agile team setup following structured SDLC phases spanning development, testing, and deployment.
 - Engineered and tested 4–5 core backend application modules using Java and SQL under direct mentor guidance.
 - Implemented efficient CRUD operations and optimized database queries to support core business workflows.
 - Participated in code reviews and integration testing to ensure high software reliability and alignment with project requirements
-

Projects

➤ Jewelry E-Commerce Web Application |

- Built a responsive user interface using React and JavaScript linked to Firebase for real-time data storage and user login.
- Managed core e-commerce modules by writing code for dynamic product filtering and live shopping cart state management.

➤ Infrastructure & Server Troubleshooting Lab | Linux, AWS, TCP/IP

- Deployed an Apache web server on a Linux EC2 instance and troubleshooted service, port, routing, and connectivity issues.
- Configured VPC, subnets, route tables, Internet Gateway, and Security Groups for controlled network access.

➤ AI-Powered Resume & Interview Intelligence Platform | React, Spring Boot, Python, PostgreSQL, Docker, AWS

- Developing an AI-powered platform for resume analysis, job-description matching, skill-gap identification, and interview preparation.
 - Designed a modular React, Spring Boot, FastAPI, PostgreSQL/pgvector, and Docker architecture supporting AWS and free-hosting environments.
-

Skills

- Languages & Web: Java, Python, SQL, JavaScript, HTML5, CSS3, JDBC, React
 - Cloud & DevOps: Amazon Web Services (AWS), EC2, S3, Firebase, Docker, Git, Linux
 - Core Concepts: Object-Oriented Programming (OOP), TCP/IP Networking, Network Troubleshooting, Relational & NoSQL Databases, CRUD, SDLC
-

Awards & Certifications

- Hackathon Achievement: Ranked among the Top 19 teams nationally in the Codeversity National Hackathon hosted at IIT Gandhinagar.
 - AWS Cloud Practitioner (CLF-CO2): Exam Preparation Completed – LinkedIn Learning (2025).
 - Full-Stack JavaScript Fundamentals: Certified Professional – LinkedIn Learning (2025).
-

Education

- Bachelor of Technology (B.Tech) in Computer Science & Engineering | Sanjivani University, Kopergaon | Expected 2027
- Diploma in Computer Engineering | Government Polytechnic, Beed | Completed 2023 | Score: 78.80%
